## PREFACE

*South Australian Economic Indicators* is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data.

Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

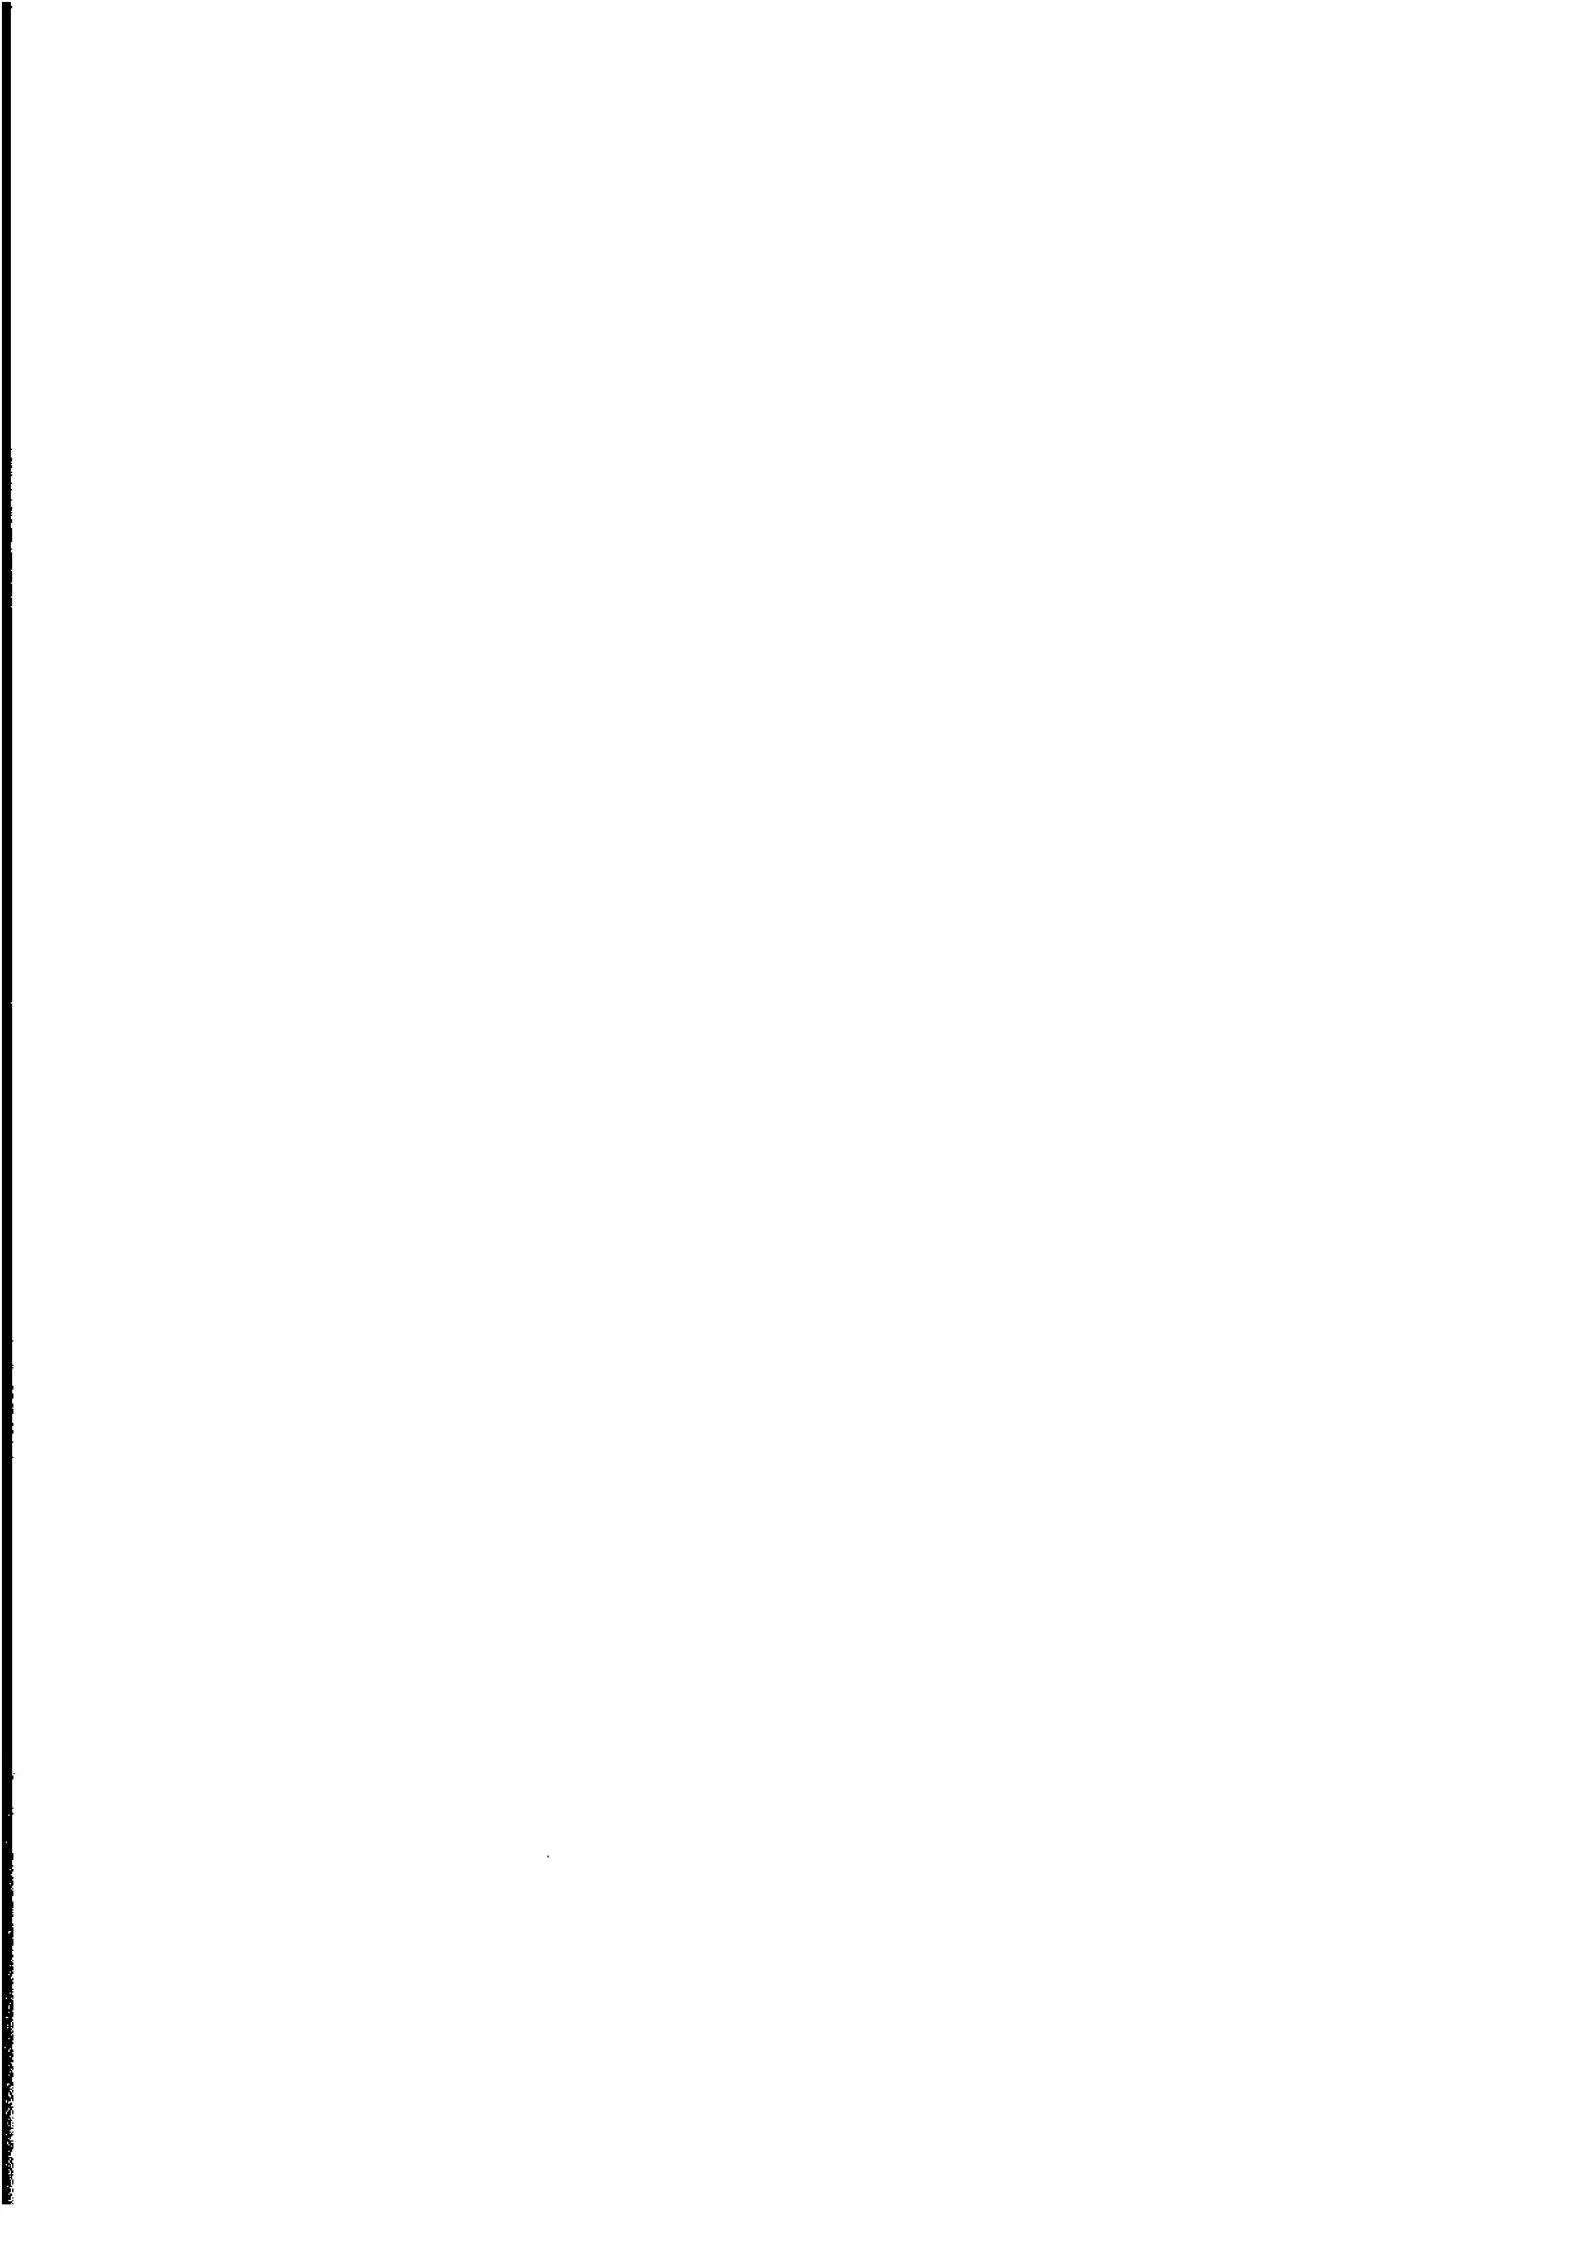

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

This issue includes a special article entitled *Government Finance Statistics: An Overview*. Future issues will contain further articles on statistical topics which concentrate on longer term trends or other issues pertinent to the South Australian economy.

If you have any inquiries concerning this publication please contact the editor, John Callinan, telephone (08) 8237 7307. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272, Adelaide SA 5001, telephone (08) 8237 7100.

## Overview

---

- Gross state product (GSP) contracted by 0.3% in the September quarter compared with a 0.5% increase in the national average.
- Merchandise exports, were valued at \$436.1 million in November an increase of 2.2% on October and a 37.6% increase on November 1995. Imports for November 1996 were valued at \$267.0 million, a 5.8% decrease on October and a 9.8% increase on November 1995.
- The trend estimate for retail sales has been in decline for the last five months with November 1996 showing a 0.9% decline from the previous month.
- The downward trend for new motor vehicle registrations in South Australia evident since April 1996 continued in November 1996 with a decrease of 0.8% from October 1996.
- The trend estimate for private new capital expenditure in South Australia for the September quarter 1996 increased by 13.4% from the previous quarter and is a continuation of trend growth which commenced in December quarter 1995.
- The trend estimate for total dwelling units approved in November 1996 increased 2.3% from October 1996.
- The value of non-residential building approved in South Australia for November 1996 increased by 39.3% to \$39.7 million from the low in October of \$28.5 million.
- The total value of building work commenced in South Australia during the September quarter 1996 fell to \$238.4 million from the previous quarters high of \$403.9 million. The total value of building work done fell by 8.2% to \$283.2 million and the total value of building work yet to be done was \$400.1 million at the end of September quarter 1996, a fall of 5.5% from the previous quarter.
- The Price Index of Materials used in House Building increased by 0.1% for the month of November in Adelaide while the index for Other than House Building, rose 0.3%.
- The trend estimate of employed persons in South Australia has decreased in each of the last six months of 1996, reaching 657,100 in December; this reverses the continuous growth evident in the first half of 1996.
- After remaining flat in the ten months to August 1996, the trend unemployment rate for South Australia has increased to 9.6% at the end of 1996.
- In October 1996, 8,750 overseas visitors arrived in South Australia for a stay of less than 12 months. This was an increase of nearly one-third (31.7%) over October 1995.
- The trend estimate for the value of owner-occupied housing commitments rose 2.9% to \$250.2 million in November 1996.

## State Accounts

---

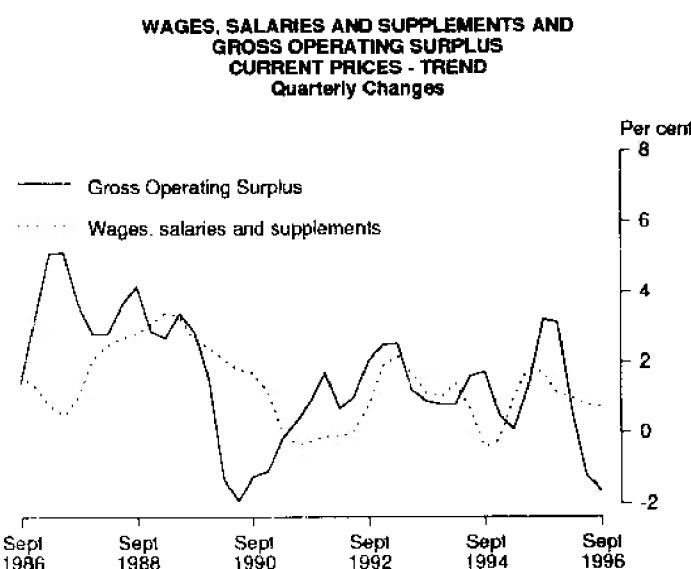

**NOTE:** Deficiencies in the data sources used to estimate gross operating surplus for recent quarters may at times lead to the current price estimates of gross state product GSP(I) being under or over stated for particular States. Consequently, the measured growth rate for constant price GSP(I) for those States will also be affected.

The constant price series for gross state product (GSP) have been labelled as 'experimental'. Users are cautioned that these estimates are derived indirectly by calculating a deflator from the expenditure components. It is emphasised that, at times, movements that can not be fully explained may be introduced into the constant price GSP(I) series through the use of this proxy deflator.

### Trend Estimates (Current Prices)

Gross state product (GSP) contracted by 0.3% in the September quarter compared with a 0.5% increase in the national average. Since peaking at 2.4% in the September quarter 1995, the growth in GSP has declined steadily. The annual growth rate of 2.4% was the lowest of all States.

The most significant factor contributing to the September quarter decline in GSP was a 1.6% decline in gross operating surplus. The annual growth rate of 0.8% was the lowest of all States.

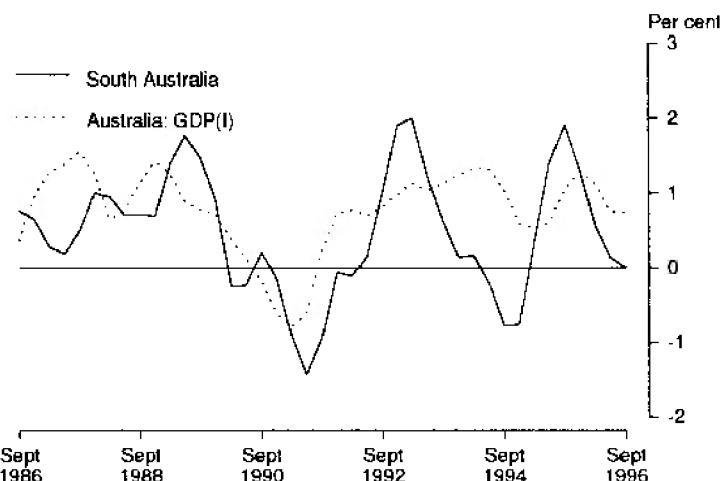

The rate of growth in wages, salaries and supplements has declined for the last 5 quarters, increasing by 0.7% in the September quarter.

No growth was recorded for indirect taxes less subsidies over the latest two quarters.

### Trend Estimates (Constant Prices)

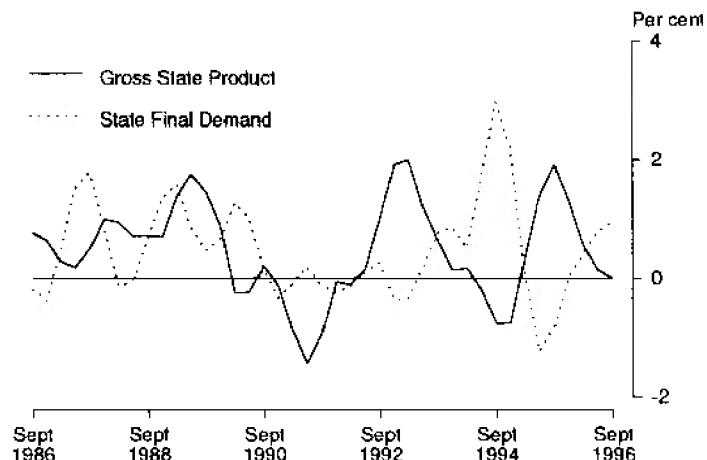

The experimental estimate of GSP at constant prices remained flat in the September quarter but increased by 2.0% through the year to September quarter 1996.

**GROSS STATE PRODUCT - TREND  
(CONSTANT PRICES)  
Quarterly Changes**

State final demand (SFD) increased by 1.0% in the September quarter and has, for the past two quarters, grown at a faster rate than GSP. September quarter growth in SFD was the highest of all States and was due mainly to a 7.3% increase in private gross fixed capital expenditure, in particular expenditure on equipment. Expenditure on dwellings fell for the eighth consecutive quarter.

**GROSS STATE PRODUCT AND  
STATE FINAL DEMAND - TREND  
(CONSTANT PRICES)  
Quarterly Changes**

There was an increase of 0.3% in private final consumption expenditure in the September quarter. The increase of 1.4% through the year to September quarter 1996 was the lowest growth rate of any State.

## International Accounts

---

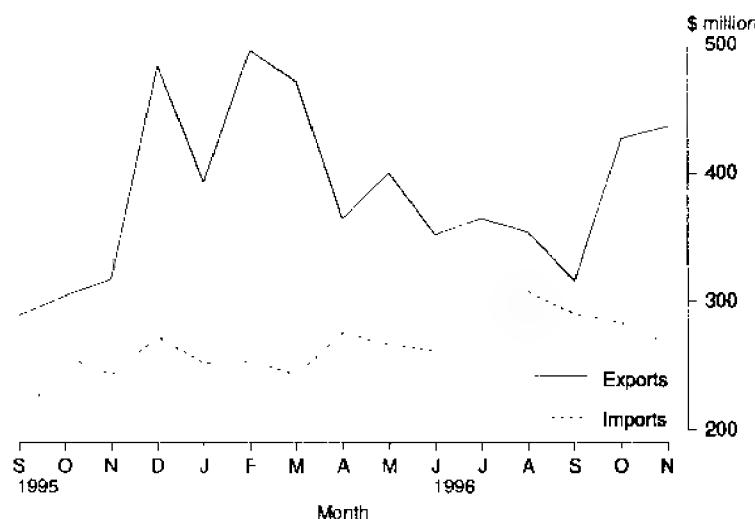

### Exports

Merchandise exports, where the final stage of production was in South Australia, were \$436.1 million in November an increase of 2.2% on October and a 37.6% increase on the corresponding period last year.

The major commodity group exported during November 1996 was road vehicles, parts and accessories with \$99.7 million, continuing the growth in this commodity over the past three months. Petroleum and petroleum products have recorded a 95.7% increase on October 1996 reaching \$39.5 million.

The United States of America was the major country of destination in November 1996 with a value of \$100.3 million, following the \$74.3 million recorded in October. Japan with \$56.6 million was next, followed by New Zealand with \$32.8 million.

MERCHANDISE EXPORTS AND IMPORTS

### Imports

The value of merchandise imports for November 1996 was \$267.0 million, a 5.8% decrease on the previous month and a 9.8% increase on November 1995. Machinery accounted for the largest proportion of imported goods with \$76.0 million or 28.5% of total imports, followed by other manufactured goods \$58.6 million (22.0%) and road vehicles, parts and accessories \$42.3 million (15.9%).

## Consumption and Investment

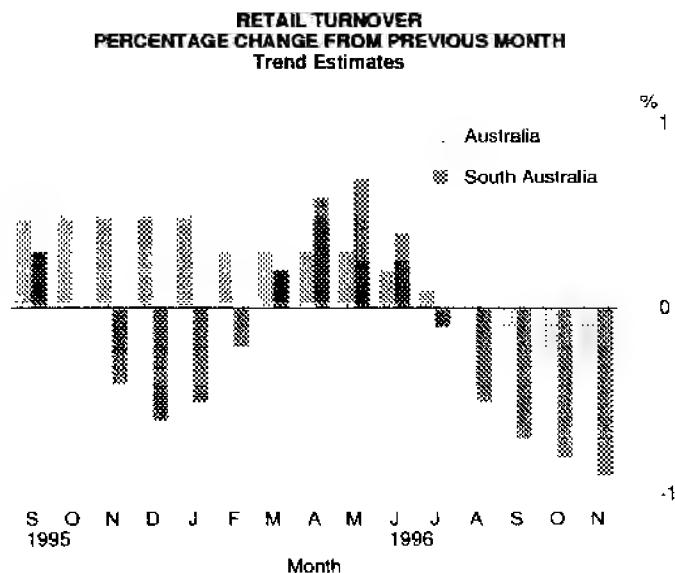

---

### Retail Turnover

The trend estimate has been in decline for the last five months with November showing a 0.9% decline from the previous month. The trend estimate for Australia fell by 0.2%.

Over the past three months the trend estimate for South Australia fell by \$17.8 million caused by decreases of \$9.4 million in hospitality and services, \$5.9 million in other retailing, \$4.6 million in household good retailing, \$3.3 million in clothing and soft good retailing, and \$1.4 million in department stores. This was partly offset by increases of \$5.5 million in food retailing and \$1.3 million in recreational good retailing group.

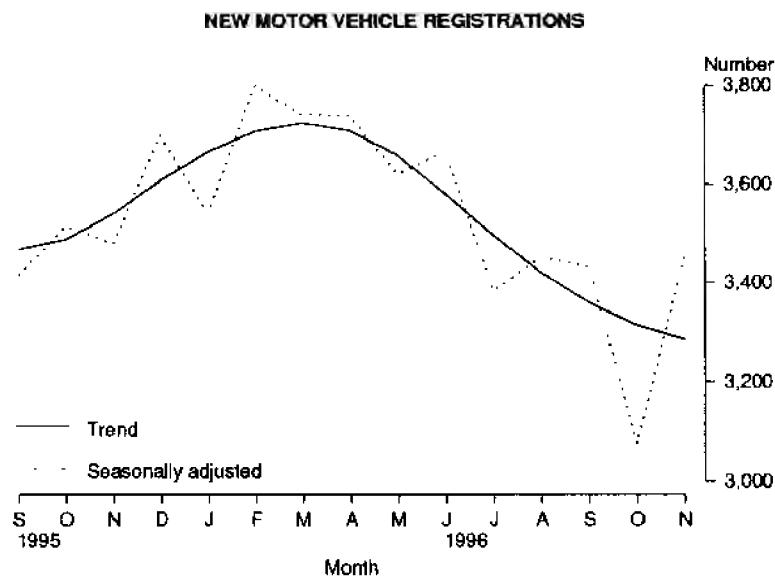

The seasonally adjusted estimate of retail trade in November 1996 increased 1.1%. In original terms, South Australian retail turnover was \$787.5 million, a decrease of 3.3% on November 1995.

#### New Motor Vehicle Registrations

The downward trend for new motor vehicle registrations in South Australia evident since April 1996 continued in November 1996 with a decrease of 0.8% from October 1996. The seasonally adjusted estimate for November 1996 increased by 12.3% from October 1996, but was 0.7% lower than in November 1995.

In original terms there were 3,512 new motor vehicles registered in November 1996, a rise of 4.4% from October 1996 and a decrease of 6.4% from November 1995. For new passenger vehicles, the leading makes registered in November 1996 were Holden (674 vehicles), Ford (657), Mitsubishi (446), Toyota (420) and Hyundai (199).

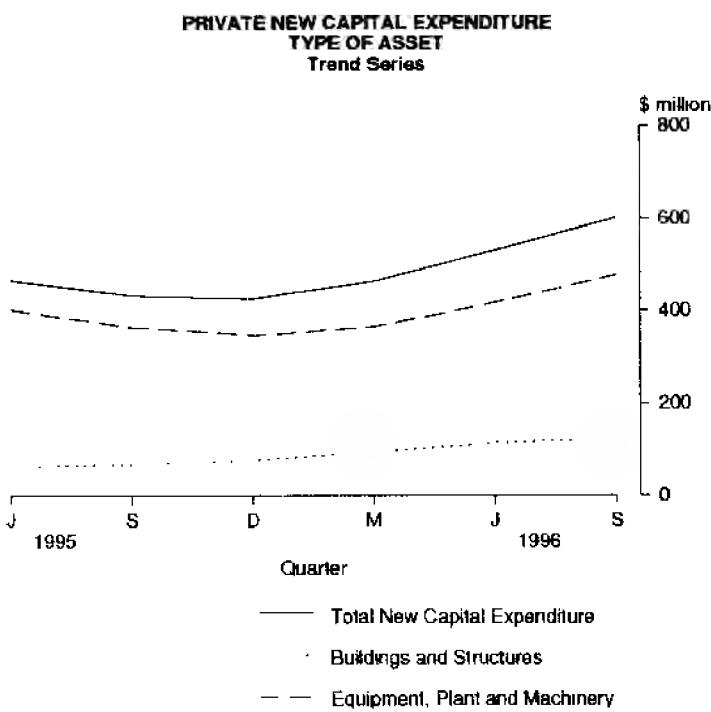

**Tourist Accommodation**

When the September quarter 1996 is compared with the September quarter 1995, the number of holiday flats, units and houses available for short-term letting increased by 10.6%. Unit nights occupied increased by 19.9% while the unit occupancy rate rose from 32.4% to 35.1%. Accommodation takings increased by 26.9% from \$2.3 million to \$2.9 million while average takings per unit night occupied rose from \$59 to \$63.

**Private New Capital Expenditure**

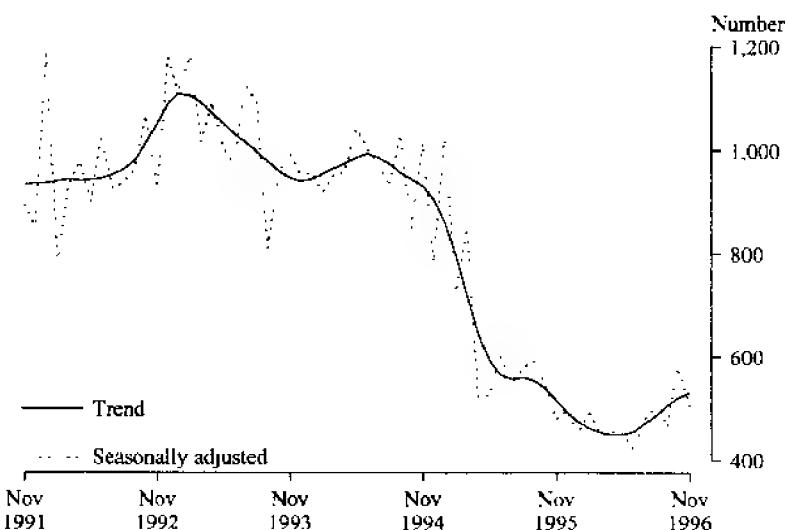

The trend estimate for private new capital expenditure in South Australia for the September quarter 1996 increased by 13.4% from the previous quarter and is a continuation of trend growth which commenced in December quarter 1995. The Australian figure rose by 4.1%. The South Australian total for the quarter now represents 5.6% of the Australian figure.

Private new capital expenditure in original terms for the September quarter 1996 was \$587 million, an increase of 13.1% from the June quarter 1996. Buildings and structures accounted for \$133 million, and equipment, plant and machinery \$454 million.

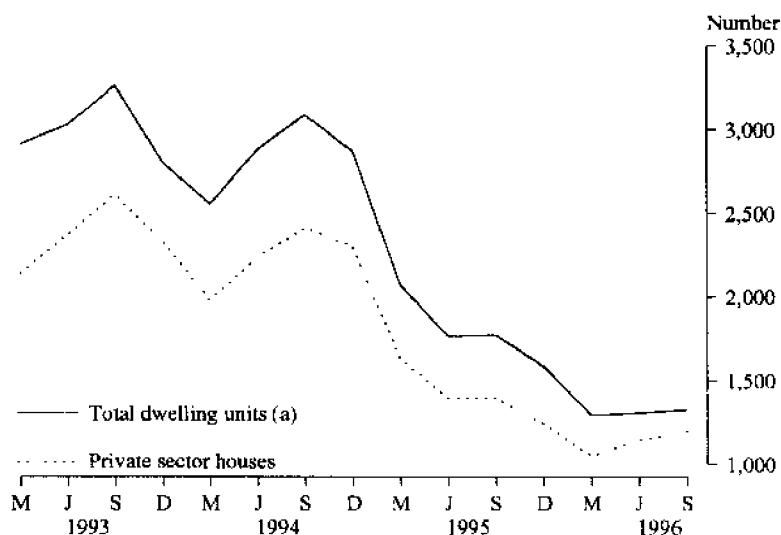

**Production****Dwelling Approvals**

The November 1996 trend estimate for total dwelling units approved in South Australia has continued its upward movement with an increase of 2.3% from October 1996 and is now more than 18% higher than the low of April 1996. In original terms, the number of dwelling unit approvals for November 1996 fell 13.8% to 488. This fall can be attributed to the October figure including an exceptionally high number of other residential dwellings. Approvals for private sector houses actually rose this month by 9.2% to 438.

The national trend estimate for the total number of dwelling units approved for November 1996 was 10,822, up by 1.1% from the October 1996 estimate and 6.2% more than the previous years estimate. In original terms, South Australia accounted for 4.4% of the total dwelling units approved in Australia during November 1996.

**DWELLING UNITS APPROVED****Dwelling Commencements**

From the Building Activity Survey, it was estimated that 1,328 dwelling units were commenced in South Australia during the September quarter 1996. This represents a rise of 1.5% from the previous quarter compared with a 3.5% fall nationally. The September quarter figure for South Australia was 25.0% below the total of a year earlier, while the national decrease over the 12 month period was 12.6%.

**DWELLING UNITS COMMENCED**

(a) Includes Conversions, etc.

**Value of Building Approvals**

The value of non-residential building in South Australia for November 1996 has increased by 39.3% to \$39.7 million from last months low of \$28.5 million. Offices, Health and Educational projects collectively accounted for over 60% of the total value of non-residential building for November 1996. For November 1996, the public sector accounted for \$21.0 million of the total value of non-residential building, the largest since March 1996.

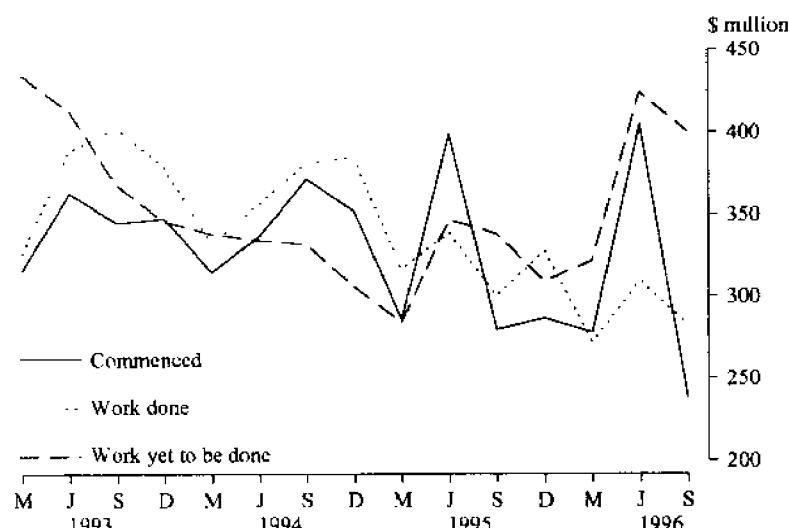

*Value of Total Building Activity*

The total value of building work commenced in South Australia during the September quarter 1996 fell by 41.0% to \$238.4 million from the previous quarters high of \$403.9 million. This fall can be mostly attributed to a 60.9% fall in the non-residential building sector, in particular, shops, other business premises and entertainment and recreational categories which had recorded substantial increases last quarter. This is the lowest value for building work commenced in South Australia recorded in over ten years.

The total value of building work done during the September quarter 1996 fell by 8.2% to \$283.2 million compared with a 3.9% increase nationally. Compared with the September quarter 1995, South Australia had a 5.5% fall in the value of total building work done which was comparable with the national movement of a 4.9% fall.

The total value of building work yet to be done in South Australia was \$400.1 million at the end of September quarter 1996, a fall of 5.5% from the previous quarter while the corresponding national figure increased by 2.1% to \$9,530.6 million. Expressed as a proportion of the national total, the total value of building work yet to be done in South Australia was 4.2% for the September quarter 1996.

**VALUE OF BUILDING ACTIVITY**

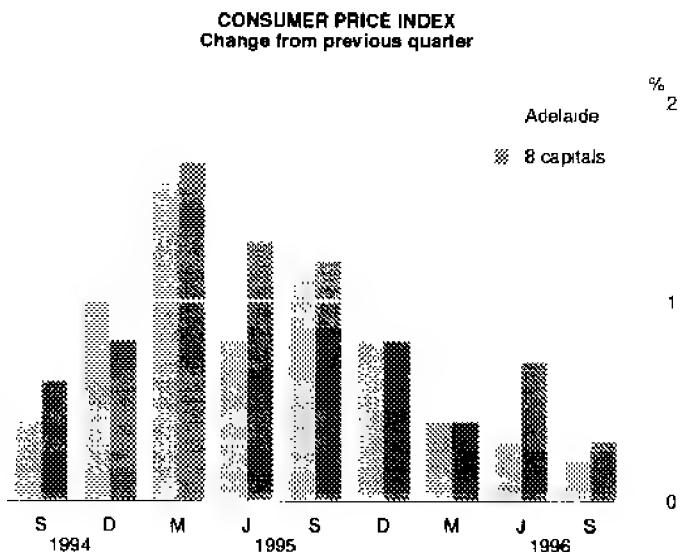

*Value of Engineering Construction*

In South Australia, the value of engineering construction work done for the September quarter 1996 was down 38.5% to \$139.1 million compared with a 9.8% fall nationally. South Australia had a 3.7% share of the national total of \$3,719.3 million. The value of work commenced during the quarter for South Australia rose 25.9% to \$247.9 million while the Australian total increased 33.6% to \$4,382.1 million. The State's proportion of national commencements was 5.7% for the September quarter 1996.

## Prices

### **Consumer Price Index**

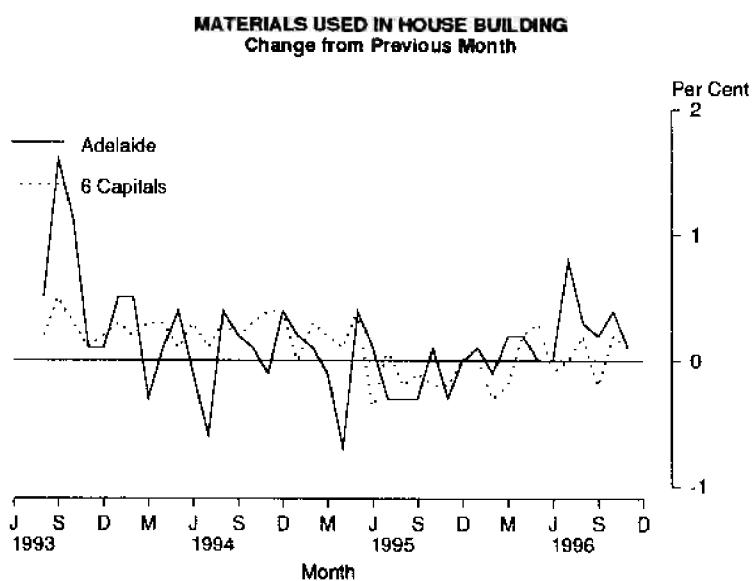

For the September quarter 1996 the Consumer Price Index (all groups) increased 0.2% for Adelaide compared with an increase of 0.3% for the 8 capital cities. These are the lowest quarterly increases recorded since December quarter 1993. The annual increase was 1.7% for Adelaide and 2.1% for the 8 capital cities.

House Building Materials

The Price Index of Materials used in House Building increased by 0.1% for the month of November in Adelaide. This was the same as the weighted average of the 6 State capitals.

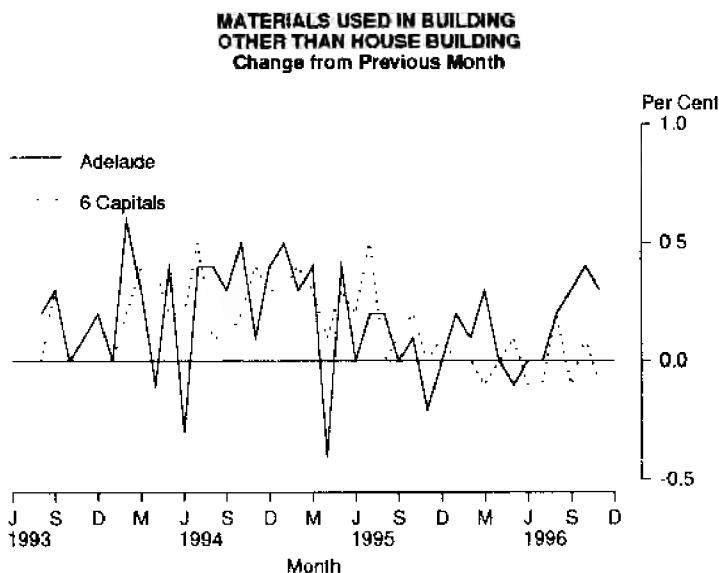

For the twelve months to November 1996, the index has risen 2.1%, while showing a rise of 0.2% for the weighted average of the 6 State capitals.

### **Non-house Building Materials**

Adelaide recorded a rise of 0.3% in the Price Index of Materials used in Building other than House Building, for the month of November. There was a decrease in the price of elevators and escalators and mains cable, but this was offset by an increase in structural steel. The weighted average of the six State capitals showed a decrease of 0.1%.

A rise of 1.5% for the 12 months to November 1996 in the index was recorded for Adelaide, while no movement was recorded for the weighted average of the 6 State capitals for the same period.

### **House Prices**

During the September quarter 1996 the Price Index of Established Houses in Adelaide decreased 0.1% whilst the Project Home Index showed a 0.7% decrease. The weighted average of the 8 capital cities index, over the same period showed a 0.4% increase for established houses and a 0.2% decrease for project houses.

Between September quarters of 1995 and 1996 the Price Index for Established Houses in Adelaide decreased by 2.0% and project homes by 1.7%. Nationally, for the 12 month period established house prices recorded a 1.2% increase and project homes decreased by 0.2%.

### **Passenger Transport Costs**

The passenger transport cost index measures changes in the costs of operating a public transport passenger bus service in Adelaide. Costs covered include labour costs, leasing charges, registration and insurance, repairs and maintenance, fuel and overheads. The index has been compiled on a quarterly basis from September 1995 with a base of 100.0 in 1993-94. The September quarter 1996 index was 104.1, down from 104.2 in June 1996. The index showed a 1.5% increase in the 12 months to September 1996.

## Labour Force and Demography

---

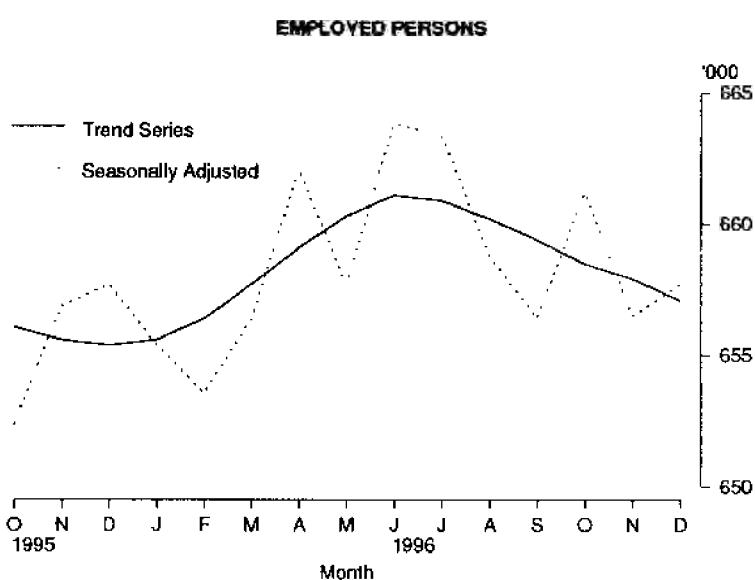

### Population

At 30 June 1996 the estimated resident population of South Australia was 1,479,147. This was an increase of 0.1% (1,417) persons from the March quarter. The continuing low growth rate for South Australia is attributable to a net outflow in interstate migration of 1,093 persons which was partly offset by a net inflow of overseas migration of 697 persons. In the June quarter there was a natural increase of 1,813 persons.

### Employment

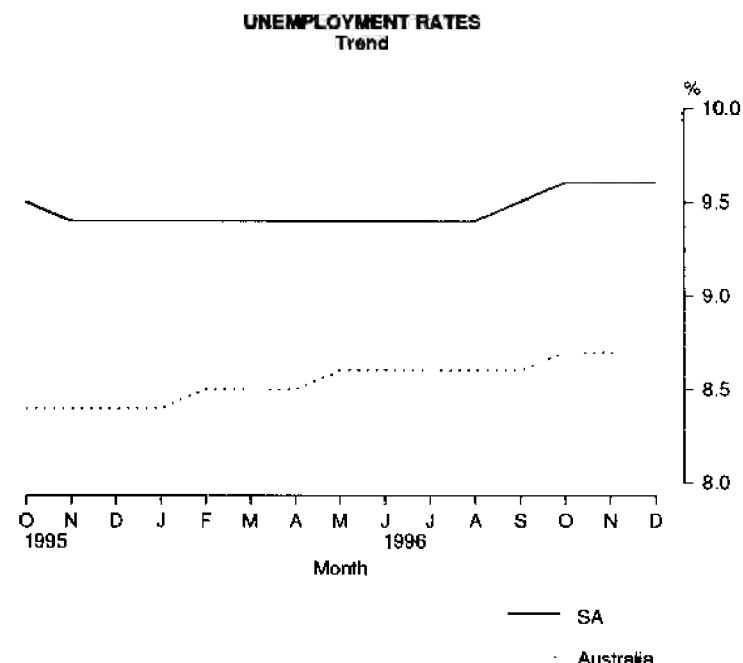

The trend estimate of employed persons in South Australia has decreased in each of the last six months of 1996, reaching 657,100 in December, this reverses the continuous growth evident in the first half of 1996.

The trend estimate of employed persons in Australia has increased for eight consecutive months, reaching 8,395,700 in December 1996.

### Unemployment

After remaining flat in the ten months to August 1996, the trend unemployment rate for South Australia has increased to 9.6% in the last quarter of 1996.

The trend estimate of the unemployment rate for Australia has risen to 8.7% in the last quarter of 1996 after remaining flat in the five months to September 1996.

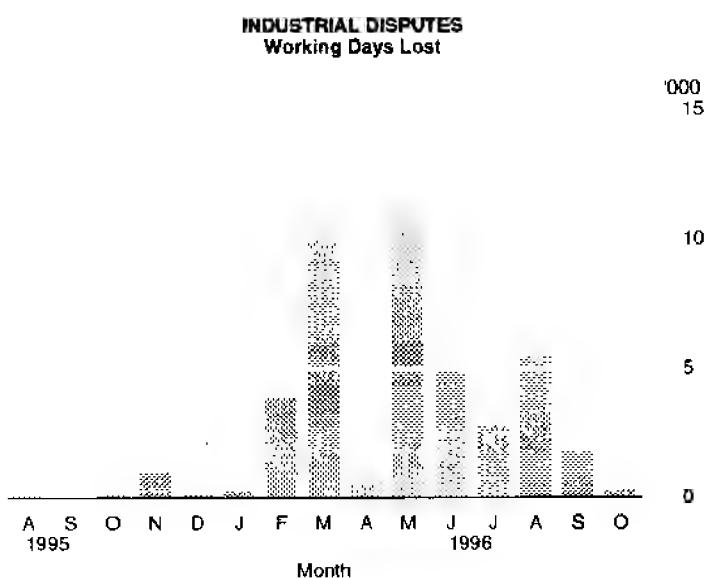

#### Overtime

In original terms, the proportion of employees who worked overtime in South Australia in November 1996 was 15.0%. This was higher than the November 1995 level of 14.3%. For Australia, the corresponding proportions were 15.9% and 16.6% for November 1996 and November 1995 respectively.

In November 1996, employees who worked overtime in South Australia recorded an average of 6.4 overtime hours per week. This was lower than the corresponding national level of 7.2 hours.

#### Industrial Disputes

There were 300 working days lost through industrial disputes in South Australia during October 1996. At 0.7% of the national total (40,300 working days lost), South Australia experienced a relatively low level of industrial disputation.

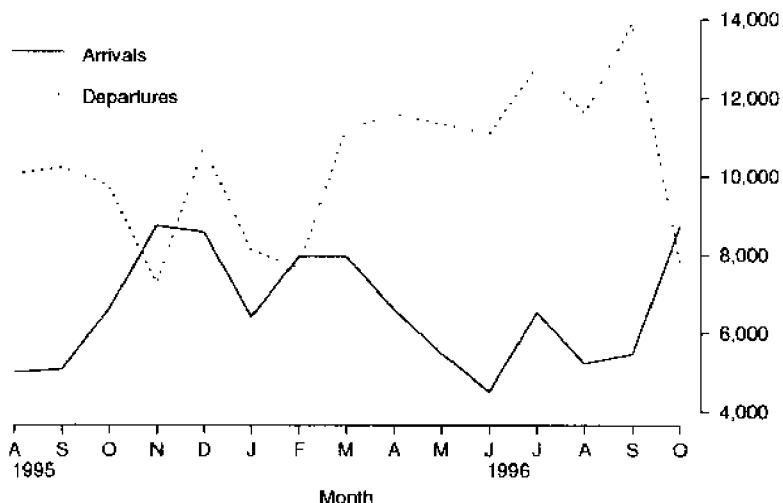

#### Short term Overseas Visitor Arrivals

There were 8,750 arrivals of overseas visitors who came to South Australia for less than 12 months in the month of October 1996. This was an increase of nearly one-third (31.7%) over the number of arrivals for the same month in the previous year, and of nearly two-thirds (59.6%) over the September total. The number of short term overseas visitor arrivals for Australia rose by only 9.3% over the 12 month period. This resulted in South Australia's share of short term overseas visitors being 2.5% of the total national figure, whereas in October 1995 it only had 2.1% of the market.

#### Short term Resident Departures

During October 1996, there were 7,829 departures of residents for short terms only (less than one year). This was a fall of 43.7% over the number of departures in September. At the same time, the number of short term resident departures for the whole of Australia rose by 14.5%. The South Australian proportion of the Australian total was 2.4%.

**SHORT TERM OVERSEAS ARRIVALS AND DEPARTURES****Incomes****Average Weekly Earnings**

The trend estimate of average weekly ordinary time earnings of full-time adult employees in South Australia increased by 0.7% in August 1996. Male full-time ordinary time earnings rose by 0.7% in August 1996. Over the same period, the increase for females was 0.6%.

Between May 1996 and August 1996, the trend estimate of average weekly total earnings of all employees in South Australia increased from \$528.00 to \$532.00.

Note: Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

**Award Rates of Pay**

In the 12 months to October 1996, the weekly award rates of pay index for full-time employees in South Australia increased by 1.4%. This compares with an increase in the index of 1.2% for Australia.

For full-time adult male employees in South Australia, the largest annual movement of the index occurred in the manufacturing industry division, with an increase of 1.9%.

For full-time adult female employees, the largest annual movement of the index occurred in the public administration and defence industry division, with an increase of 3.0%.

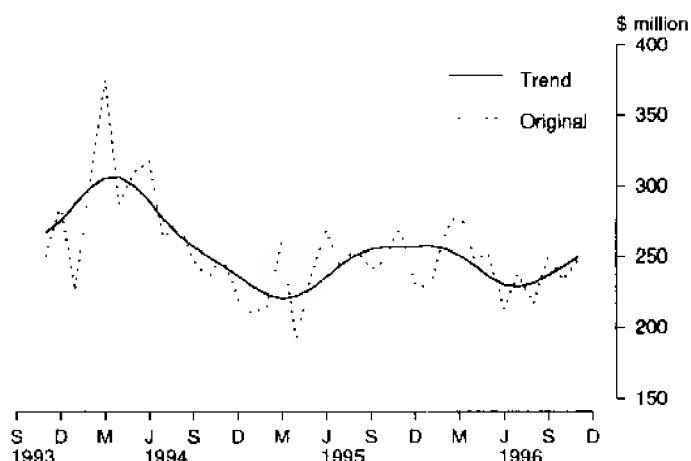

## Financial Markets

---

### Housing Finance

The upward climb of the trend estimate for the value of owner-occupied housing commitments continued with November rising 2.9% to \$250.2 million, 2.4% below November 1995. The national trend increased 0.8% for the month, 10.8% above the previous November.

**SECURED HOUSING FINANCE COMMITMENTS  
TO INDIVIDUALS (ALL LENDERS)  
(Excluding Alterations and Additions)  
Monthly Total**

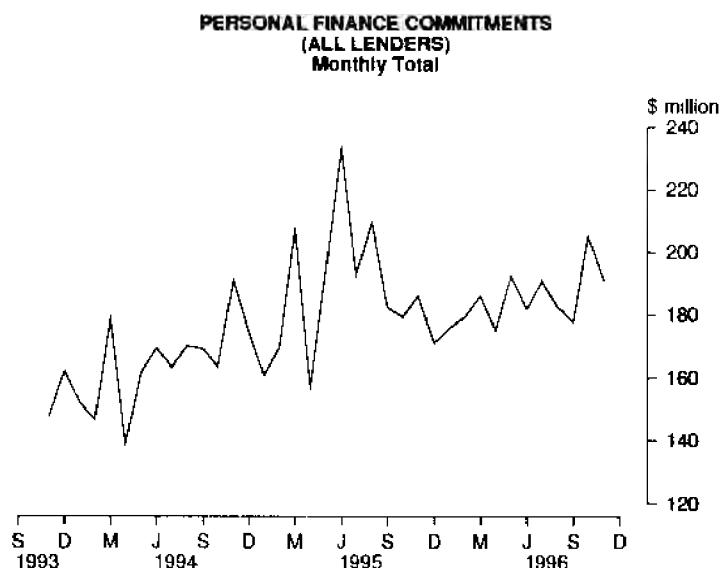

Total housing finance commitments (original figures including alterations and additions) increased 6.0% in November to \$262.4 million, 10.9% below November 1995. The bulk of this increase was due to the 7.5% (\$11.6 million) rise in commitments for the purchase of established dwellings which reached \$165.8 million, only marginally below the previous November. The other major increase was for commitments for newly erected dwellings, particularly dwellings other than houses which recovered after eleven low months.

Construction of dwellings decreased marginally to \$27.0 million, 15.4% below the previous November. Refinancing and alterations and additions remained at the lower levels recorded in the previous month, significantly below the corresponding months of the previous year. This followed the pattern of the national figures.

### Personal Finance

Total commitments for November fell 7.0% to \$190.9 million following the high total for October, but remained marginally above the previous November. The national decrease for the month was 10.9%, 3.7% below November 1995. South Australian commitments increased marginally to 7.1% of the national total.

Fixed loan commitments decreased 11.8% to \$108.5 million, 11.2% below November 1995. The main falls were for refinancing, used motor vehicles and debt consolidation. Refinancing was down 27.8% to \$14.1 million, the lowest month since early 1994 and 38.4% below the previous November. Used motor vehicles dropped by 11.4% to \$35.5 million after a relatively high October but has risen to 8.9% of the national total.

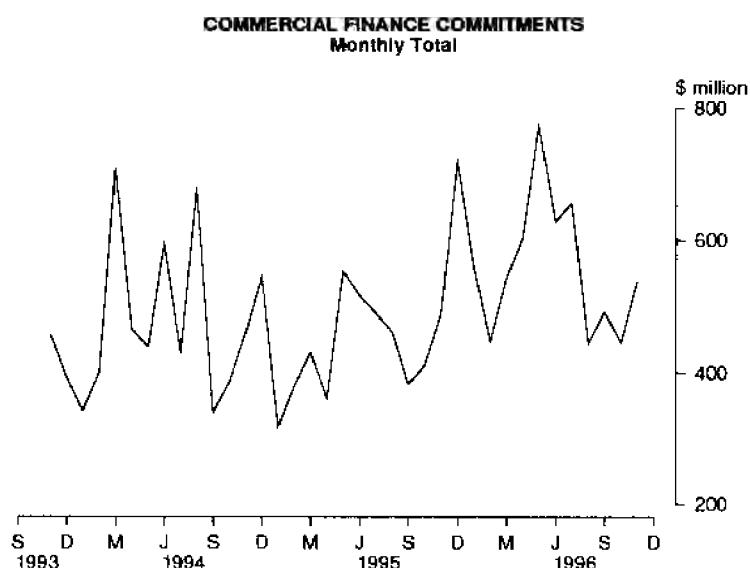

Revolving credit facilities increased marginally, continuing at a high level due to a 19.3% increase in secured facilities to \$43.7 million, the highest recorded month which more than offset the 15.3% fall in unsecured facilities.

*Commercial Finance*

Total commercial finance commitments increased 20.9% to \$539.1 million, 10.4% above November 1995. This continued the pattern of the past year, with every month except August significantly above the corresponding month of the previous year. South Australia's proportion of the national total rose to 4.6%.

Commitments under fixed loan facilities increased 38.6% to \$378.9 million during November, 24.8% above November 1995. The main increases were for transport and storage, up \$62.6 million and property and business services up \$48.7 million. Manufacturing increased \$15.8 million after a low October.

Revolving credit facilities decreased 7.1% to \$160.2 million, 13.2% below November 1995. The main decreases were for manufacturing down \$32.1 million and property and business services down \$14.2 million. Agriculture, forestry, fishing and hunting increased \$47.1 million after four relatively low months.

**Lease Finance**

The value of goods under new finance lease commitments increased 14.2% to \$17.4 million, 17.0% below the previous November. The South Australian proportion of the national total increased to 3.1%.

The main increases were for new heavy trucks (up \$0.8 million), electronic data processing equipment (up \$0.7 million) and other (up \$1.5 million). New motor cars and station wagons not subject to depreciation (the largest category) increased 9.8% (\$0.4 million) to \$4.6 million, which represented 3.0% of the Australian total and was 4.0% below November 1995. Those subject to depreciation increased by \$0.2 million but remained at the very low level of the previous two months.

The main fall was for office machines, down \$1.3 million to \$0.5 million, the lowest month since June 1992.

**Forward Outlook***Composite Leading Indicator*

The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to assist the detection of turning points between successive expansions and slow downs of economic activity as measured by constant price GDP(A). It does not attempt to forecast the level of economic activity.

In the September quarter 1996 :

- the experimental CLI rose 0.18%, following a 0.31% rise in the June quarter 1996.
- The CLI is showing a trough at the September quarter 1995 followed by strong growth.

The quarterly data are released in more detail in the *Australian Economic Indicators* (1350.0). The CLI was the topic of the Focus article in the September 1993 edition of *South Australian Economic Indicators* (1307.4).

**Australian Business Expectations** Surveys of business expectations have been available to decision makers for a number of years from several sources. These surveys provided *qualitative* indicators in the form of the net proportion of businesses expecting a rise or fall in future business conditions. Since the December quarter 1993, the ABS has been compiling a *quantitative* indicator of business expectations in the form of an expected weighted aggregate change in a range of economic variables. These data are available on a quarterly basis in *Australian Business Expectations* (5250.0).

**AUSTRALIAN BUSINESS EXPECTATIONS SOUTH AUSTRALIA AND AUSTRALIA  
SALES OF GOODS AND SERVICES  
EXPECTED PERCENTAGE AGGREGATE CHANGE**

Reference Period	Short term		Medium term	
	Expected aggregate change between		Expected aggregate change between	
	Sep. 1996 and Dec. 1996	Dec. 1996 and Mar. 1997	Dec. 1996 and Dec. 1997	Mar. 1996 and Mar. 1997
	%	%	%	%
South Australia	2.1	-0.1	4.3	3.6
Australia	1.6	0.4	3.1	4.1

***Short term***

Businesses in South Australia expect a decrease of 0.1% in sales of goods and services in the March quarter 1997 compared with the December quarter while the national expectation was a 0.4% increase.

***Medium term***

Businesses in South Australia expect sales of goods and services in the December quarter 1997 to be 4.3% above December quarter 1996. Australia wide the expectation was for 3.1% growth.

# PC AUSSTATS

## Online access to the latest statistical information from the ABS

### The most accessible statistics in Australia . . .

With PC AUSSTATS, getting access to ABS information has never been easier.

### Online, all the time . . .

You'll never be without vital information again. PC AUSSTATS will let you access the information you need, when you need it — 24 hours a day, 7 days a week.

You can connect to the ABS database and find the information you want, simply and quickly. And once you've selected the information, downloading to your PC is done for you by the PC AUSSTATS software.

### Ready to go . . .

Once downloaded, the data is in .wks format — compatible with all the most common spreadsheet packages available today — so it's ready for instant analysis and manipulation on your own PC.

And with thousands of series covering the most important economic and social data, it's like having your own private ABS library — with librarian.

### With the latest information . . .

By using PC AUSSTATS, you will know that you have the latest information available.

The main PC AUSSTATS database is updated daily, giving you full access to the latest facts and figures about the nation.

Plus, you don't have to worry about revisions or corrections to the data — the PC AUSSTATS database is updated in line with any revisions to our printed publications.

### . . . and a historical perspective

The database that you access with PC AUSSTATS gives you time series data.

So you get not only the latest information, but also a historical perspective — and this gives you the base you need to perform your own trend analysis.

Historical information is typically available for a 15 year period for all series on PC AUSSTATS — and this includes monthly, quarterly, half yearly and yearly series.

### Arrange a demonstration today . . .

# FOCUS

## Government Finance Statistics: An Overview

*This article was contributed by Trevor Ward, Australian Bureau of Statistics, Adelaide.*

### Introduction

The presentation of Government Finance Statistics (GFS) used by the ABS is based on international standards, the *International Monetary Fund's Manual on Government Finance Statistics* and the United Nations' *A System of National Accounts* (SNA).

GFS is designed to present a consolidated picture of the financial transactions of all public sector entities. Excluded from GFS are the operations of Government-owned and controlled financial enterprises.

In this article a number of interstate comparisons have been made. Although data is comparable in terms of concepts and definitions used, inconsistencies may still remain reflecting differences in:

- . the division of responsibilities between the State public sector, the local government sector and the private sector;
- . access to revenue sources such as mining royalties;
- . the size and performance of State economies;
- . the level of Commonwealth financial assistance to each State.

### Public Sector Indebtedness

Debt finance is an important source of funding for publicly provided capital assets and infrastructure. The size of the State's debt is important because of its impact on the State's budget in terms of the associated interest and debt servicing costs.

Debt is defined as those liabilities which carry a contractual obligation to service or repay principal (including financial leases) and broadly comprise South Australian Government borrowings (both domestic and offshore), advances received from the Commonwealth, and deposits held from other sectors.

By convention, debt is generally recorded on a net basis ie after deducting from the gross debt cash and income-generating financial assets.

The net debt of the South Australian public sector at 30 June 1996 was \$7 753 million. This was made up of gross debt of \$12 327 million, offset by financial assets of \$4 574 million in the form of loans, bank deposits, short term investments such as bank bills, and bonds of the Commonwealth and State Governments.

South Australia's net debt is the third highest of all the States/Territories both in per capita terms and as a percentage of Gross State Product (GSP). In the early 1990s South Australia's net debt per capita moved from fifth highest to third highest due to financial support (approximately \$2.5 billion)

required for the State-owned financial institutions, mainly the State Bank and SGIC. The required financial support was financed mainly by net borrowings.

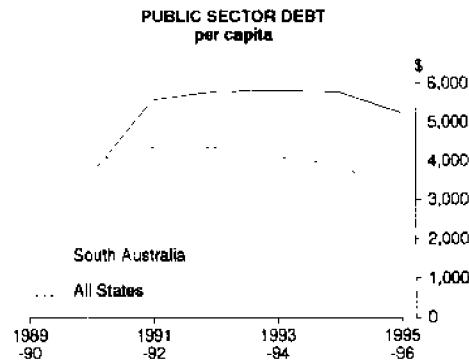

STATE PUBLIC SECTOR DEBT

At 30 June 1996

State/Territory	Net debt (\$ million)	Net debt- per capita (Dollars)	% of GSP (Per cent)	Unfunded employee entitlements (\$ million)
New South Wales	18 582	3 002	12	19 144
Victoria	20 617	4 540	16	17 515
Queensland (a)	-2 456	-732	-3	8 423
South Australia	7 753	5 241	22	5 341
Western Australia	6 323	3 587	12	5 648
Tasmania	3 283	6 935	32	1 803
Northern Territory	1 351	7 603	26	1 049
ACT	214	696	2	107
<b>Total</b>	<b>55 600</b>	<b>3 040</b>		<b>59 937</b>

(a) Includes funds set aside internally within the public accounts to fund superannuation liabilities.

After peaking at 28.4% of GSP at 30 June 1992, there has been a steady decline in the ratio to 22.0% at 30 June 1996 reflecting debt repayment from the proceeds of asset sales.

The large reduction in public sector debt/per capita for the all States category in 1995-96 is primarily due to a fall in Victorian government debt following the sale of government electricity undertakings. Interstate comparisons of net debt and unfunded employee entitlements can be affected by differing budgetary and financing arrangements. Also a number of the larger States are moving more to private sector involvement in the provision of infrastructure.

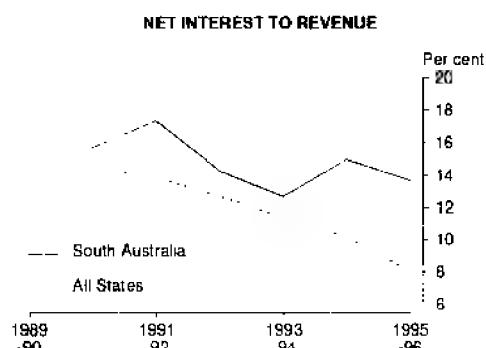

Debt is only part of a State's overall liabilities as it does not include large accruing liabilities such as unfunded superannuation and other employee

entitlements. At 30 June 1996, these liabilities are estimated to be \$5 341 million or \$3 614 per capita. By comparison, total Commonwealth and State/Territories unfunded employee entitlements are estimated to be \$129 380 million or \$7 094 per capita.

The ability to service any level of debt can be assessed by comparing the cost of servicing that debt to the revenue available to meet those costs.

The convention in government finance statistics is to record interest flows on a gross rather than a net basis. However, there are occasions when use of a net figure may be more appropriate, especially where different administrative or funding arrangements between governments hinder comparison of results.

The following graph shows net interest payments as a proportion of total revenue. Net interest paid to revenue increased significantly from 1990-91 to its peak of 17.4% in 1991-92. Since 1991-92, the ratio has fallen to a level between 13-15%.

### Deficit Measures

In GFS, the focus is on outlays and revenues and the methods used to finance any shortfall (deficit) between the two.

The financial performance of the public sector is measured, in part, by its 'bottom line', ie its deficit/surplus result on total operations.

Management of debt levels and in particular government deficits is a primary focus of public sector reform in Australia because deficits in the main:

- . add to the stock of government debt;
- . increase debt servicing costs;
- . reduce flexibility in program management
- . constrain ability for new initiatives; and
- . constrain ability to reduce taxes and charges.

Projections of Commonwealth and State deficits and net debt for 3 forward years (medium-term fiscal outlook) are prepared and published in the *National Fiscal Outlook* by a working party of Commonwealth and State Treasuries.

A number of different 'bottom line measures' could be used to assist in the analysis of GFS although the main measure currently used is the cash based deficit which is defined as:

	Current outlays
<i>plus</i>	Capital outlays
<i>less</i>	Revenue and grants
<i>less</i>	Provisions
=	Deficit

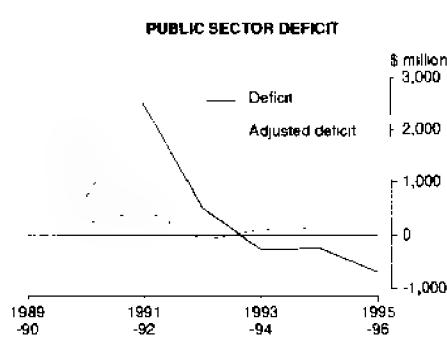

However, this measure suffers from a number of serious disadvantages when used to compare States because it is seriously distorted by events such as asset sales. Because asset and equity sales are classified as offsets to capital outlays, these receipts are shown as a reduction in the deficit rather than as a means of financing the deficit. This means a government may achieve a balanced budget result simply by selling off its productive enterprises.

Net proceeds from the sale of major South Australian government businesses in recent years include:

1993-94	SAGASCO (\$417 million)
1994-95	Pipelines Authority (\$291 million)
	Enterprise Investments (\$16 million)
1995-96	BankSA (\$797 million)
	SGIC (\$96 million)
	FleetSA (\$48 million)
	SAHT - shopping centre (\$27 million)

Source: Treasurer's Financial Statements and Budget Papers

A measure used by the ABS which excludes the effect of asset sales is the deficit adjusted for net advances (ie excludes net injections/acquisitions or sales of equity as well as other lending for policy purposes). This deficit measure can be used to provide an indicator of the 'structural' deficit.

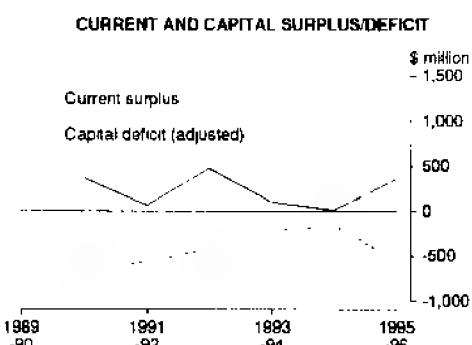

The South Australian public sector has consistently been in deficit (after adjustment for asset sales). The level of the deficit may vary from year to year because of changes in Government policy, abnormal receipts or payments eg targeted separation packages, changes in arrangements for funding accruing superannuation liabilities, and the volatile nature of stock holdings of the Australian Barley Board.

The adjusted deficit for 1995-96 was \$185 million, a slight increase on 1994-95 but considerably below the \$492 million deficit recorded in 1991-92. South Australia and the ACT were the only States/Territories to record an adjusted deficit in 1995-96.

The \$50 million increase in the adjusted deficit for 1995-96 was mainly due to a significant increase in barley stocks (\$331 million). Offsetting this movement were increased taxation revenue (\$155 million) and falls in final consumption expenditure (\$53 million), net interest payments (\$67 million) and gross fixed capital expenditure (\$62 million).

### Current and Capital Deficits

The deficit can be further dissected into the current deficit and the capital deficit. The current deficit measures the difference between recurrent revenues eg taxation, Commonwealth grants etc and current outlays. The capital deficit is a measure of the extent to which expenditure on fixed assets and capital transfers exceed capital receipts. The capital deficit can be financed by recurrent surpluses, borrowing or a combination of both.

The South Australian public sector recorded a surplus of \$357 million on current operations (due mainly to the public trading enterprises sector), but experienced a further increase in the capital deficit for 1995-96. Contributing to the deterioration in the capital deficit were the phasing out of special capital compensation grants from the Commonwealth in relation to the sale of the State Bank and changes in barley stocks.

### Outlays

Outlays measure the economic activity of government and may be classified as either current or capital. Current outlays include the day-to-day running costs incurred in providing government services eg wages and salaries and purchases of goods and services, as well as transfer payments such as interest, subsidies and grants to other sectors of the economy.

Capital outlays include expenditure on fixed assets such as houses, buildings, plant and equipment and infrastructure. It also includes transfer payments to

other sectors in the way of capital grants and advances.

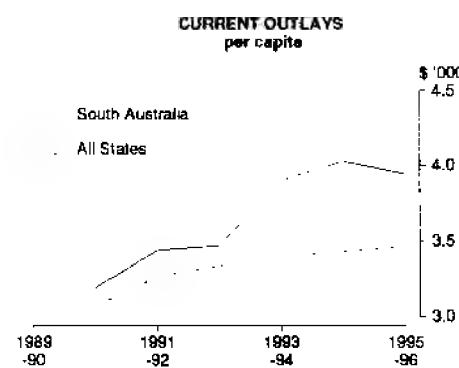

### STATE PUBLIC SECTOR OUTLAYS (\$ million)

Item	1993-94	1994-95	1995-96
<b>Current outlays:</b>			
Final consumption expenditure	4,070	4,122	4,069
Interest payments (net)	758	906	839
Subsidies paid to PTEs	285	277	255
Other	612	618	654
<b>Total current outlays</b>	<b>5,725</b>	<b>5,923</b>	<b>5,817</b>
<b>Capital outlays:</b>			
Capital expenditure on-			
New fixed assets	889	855	915
Second-hand assets	-215	-204	-326
Land and intangibles	-12	11	6
Capital grants to other sectors	41	62	40
Other capital outlays	-87	-180	151
<b>Total capital outlays (excluding advances)</b>	<b>618</b>	<b>544</b>	<b>786</b>
<b>Total outlays (excluding advances)</b>	<b>6,343</b>	<b>6,467</b>	<b>6,603</b>
Advances paid (net)	-369	-374	-883

The net cost of service provision (final consumption expenditure) is the most important component of current outlays and for 1995-96 represented 70% of current outlays. Interest payments are the second most important component. Net interest payments rose 76% between 1988-89 and 1991-92 and have remained at high levels since. However, net interest payments in 1995-96 only required 40% of the State's tax revenues to service compared with 55% in 1991-92. Interest payments during any period are a factor of average level of debt during the period and average interest rates.

Public sector current outlays in 1995-96 were 16.5% of GSP whereas capital outlays (excluding advances) represented 2.2% of GSP. Since 1990-91, current outlays as a proportion of GSP have remained fairly constant in the range 16-18% with the highest proportion (17.9%) occurring in 1993-94 and 1994-95.

South Australian current outlays (per capita) have increased at a faster rate than for all States combined in the 5-year period 1990-91 to 1995-96.

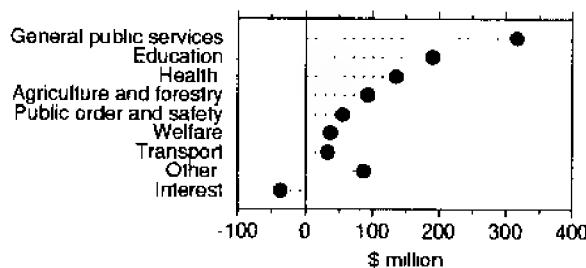

The main contributor to this growth has been net interest which rose \$75 per capita over this period compared with a decrease of \$161 per capita for all States combined. South Australia also experienced slightly higher growth in final consumption expenditure over this period. Final consumption expenditure for South Australia was \$2,758 per capita in 1995-96 compared to \$2,485 for all States combined. However, South Australian capital outlays have grown at rates below all other states combined.

### Outlays by Purpose

The purposes served by government expenditure programs are summarised in the following table.

Expenditure on health and education are the two largest government programs accounting for 47.1% of total outlays (excluding advances paid and asset sales). Net interest payments account for a further 14.4%.

**CHANGES IN OUTLAYS BY FUNCTION  
1991-92 to 1995-96**

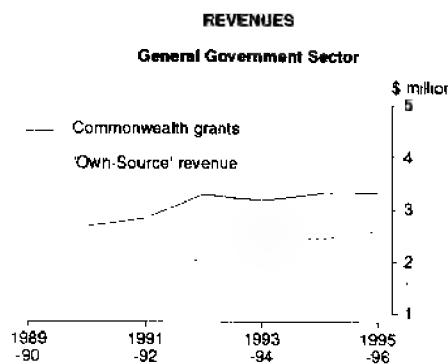

Since 1991-92, the largest growth has been for the function General Public Services which has increased by \$317 million (128.1 %) due mainly to revised superannuation arrangements and the funding of past service superannuation liabilities.

### Revenues

Revenue is the primary means of funding government outlays, with any shortfall funded through borrowings or a rundown of financial assets.

Grants from the Commonwealth government represent the single most important source of revenue in South Australia. In 1995-96 these grants represented 56.2% of the State's general government sector revenue.

Taxation represents the most important category of 'own-source' revenues. South Australia has the third

lowest level of taxes, fees and fines of all the States. South Australia's taxation revenue has grown at approximately the same rate (44%) as all the other States over the period 1990-91 to 1995-96.

Other important sources of revenue to the government are user charges (shown as an offset to current expenditure in GFS to derive final consumption expenditure), royalties, and income from government owned financial enterprises.

The Commonwealth Grants Commission assesses the revenue raising capacity of each state. This is done for each category of tax e. g. payroll tax and for the state in aggregate. The resulting ratios are calculated against a national benchmark of 100. For 1994-95 the taxing capacity of South Australia has been calculated at 86.8% ie revenue raising capacity is almost 13% below the the national average taking into account factors such as the demographics of the state, spending patterns and the structure of the economy. However, in revenue raising effort South Australia at 96.2% is almost 4% below the national average as shown in the table below.

Allowing for their limitations these Grants Commission data are generally consistent with and reflective of the South Australian Governments effort to minimise the taxation burden on businesses.

### STATE TAXATION REVENUE

(\$ million)

Item	Capacity and tax ratios (a):			
	1994-95	1995-96	Tax capacity	Tax effort
	\$m	\$m	%	%
Payroll tax	422	476	89	89

Tobacco	185	212	91	119
Liquor	42	46	101	75
Other taxes nec	119	120	n.a.	n.a.
Fees and fines	71	76	n.a.	n.a.
Total	1,945	2,100	87	96

(a) Source: Commonwealth Grants Commission. The ratios apply to 1994-95 taxation revenue.

## Operations of Public Trading Enterprises

Government-owned businesses referred to as public trading enterprises (PTE'S) are significant contributors to economic activity. At 30 June 1996, there were 21 PTEs owned and operated by the South Australian Government.

Public trading enterprises are mainly engaged in the production of goods and services with the aim of recovering a significant proportion of costs through user charges. The activities undertaken are diverse and include electricity generation and distribution, water supply, lotteries, urban public transport, public housing and the operation of ports.

Comparisons of the operations of the PTE sector over time (and between States) is made difficult because of the sale of government businesses, outsourcing and the timing of reform programs etc.

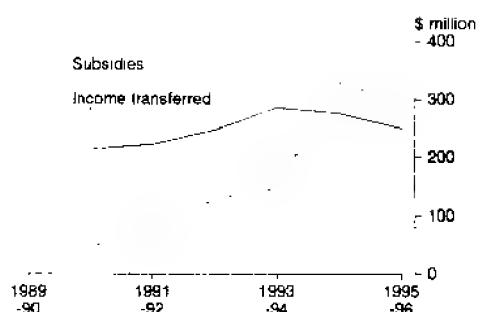

A summary of the financial performance of South Australian PTE'S is shown in the following table.

**FINANCIAL PERFORMANCE OF PUBLIC TRADING ENTERPRISES**  
\$ million

Particulars	1993-94	1994-95	1995-96
Operating revenue	2,770	2,959	3,010
Operating expenditure	2,616	2,640	2,735
<i>Trading surplus</i>	154	319	275
Subsidies	285	276	250
Other revenue	74	67	48
<i>Earnings before interest and tax</i>	513	662	573
Interest paid	319	309	292
<i>Net profit before tax</i>	194	353	281
less transfer payments	162	345	315
<i>Retained earnings</i>	32	8	-26

Subsidies paid to public trading enterprises have fallen in the past three years. The most significant subsidy payments relate to the provision of public transport services and public housing (90 per cent of total subsidies in 1995-96). Subsidies in recent years also include targeted separation packages (TSPs) paid by the State Government to PTE'S.

## SUBSIDIES AND INCOME TRANSFERRED

There has been a significant increase in the level of income transferred by PTE'S to the State government. The most significant contribution has been from the Electricity Trust of South Australia and in recent years contributions from SA Water Corporation. Income transferred in 1995-96 includes for the first time tax equivalent regime (TER) payments, ie equivalent Commonwealth income and wholesale sales taxes, in accordance with the Commonwealth-State agreements relating to the tax treatment of public trading enterprises.

## ABS PUBLICATIONS AND PRODUCTS

Statistics collected by the ABS are generally made available in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues on Tuesdays and Fridays a *Release Advice* (1105.0) which lists publications to be released within the next few days. The Catalogue and Release Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the ABS *Publication Mailing Service* on 1800 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The ABS *Information Consultancy Service* has specialist staff to assist and advise clients

with their statistical inquiries. For more detailed information about these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 8237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide SA 5001.

The ABS also provides a *Statistical Consultancy Service*, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, on (08) 8237 7379.

## SYMBOLS AND OTHER USAGES

n.a.	not available
n.y.a.	not yet available
..	not applicable
0,0.0	nil or rounded to zero

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
